## SUMMARY

---

Impact-focused iOS Developer with 2+ years of hands-on production experience delivering scalable, secure, and high-performance iOS applications. Strong command of Swift, UIKit, SwiftUI, and MVVM, with proven expertise in REST API integration, local persistence, and modern concurrency. Experience across banking, health-tech, insurance, e-commerce, and government domains, delivering stable production apps. Interview-ready for mid-level iOS Developer roles.

## EXPERIENCE

---

### iOS Developer — NeoSOFT Technologies

May 2023 – Present • Mumbai

- Built and maintained multiple production-grade iOS applications using Swift, UIKit, and SwiftUI.
- Applied MVVM architecture to improve code readability, scalability, and testability across modules.
- Integrated RESTful APIs using URLSession and Alamofire with robust error handling and secure token management.
- Improved app performance and stability by optimizing memory usage, UI rendering, and background tasks.
- Implemented Core Data for offline storage and seamless data synchronization.
- Collaborated with cross-functional teams in Agile/Scrum environment, participating in code reviews and sprint planning.

## PROJECTS (PRODUCTION)

---

- **IR-Meeting** — Meeting & calendar management app with custom calendar UI and offline support using Core Data.
- **NeoStore** — E-commerce app featuring product listing, cart, and checkout flows using MVVM architecture.
- **BCG – Union Bank** — Banking modules including secure login, OTP authentication, and encrypted REST APIs.
- **GOQii** — Health-tech app features including AI-based food scan and Firebase push notifications.
- **MPCB** — Government app with complex forms, validations, and reliable local data persistence.
- **Kiwi Insurance (SwiftUI)** — Fully SwiftUI-based app with policy listing, premium calculation, REST APIs, and MVVM.

## SKILLS

---

**Languages & UI:** Swift, SwiftUI, UIKit  
**Architecture:** MVVM, Clean Architecture (Basics)  
**Networking:** REST APIs, URLSession, Alamofire  
**Concurrency:** GCD, async/await  
**Storage:** Core Data, UserDefaults  
**Tools:** Xcode, Git, Postman, TestFlight  
**Testing & DevOps:** XCTest (basic), CI/CD (basic)  
**Other:** Firebase, Agile/Scrum

## EDUCATION

---

PG – DMC, Sunbeam Institute, Pune (2023)  
B.E. – Computer Science, Shivaji University (2019)
